

CellSine

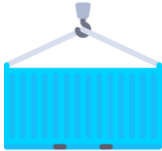

Electrical Cell Culture Monitoring

Versatile

Study the phenomenon you want

CellSine technology can perform measurements on a variety of phenomena.

Modular

Adapt it to your needs

The CellSine devices are modular and can be configured to accommodate up to 8 docking stations.

Label Free

Study your system without affecting it

Since CellSine technology only use weak electrical signals to gather information, the studied biological system remains unaffected.

Real Time

Follow the events as they happen

CellSine technology allows you track your experiment in real time.

Easy visualization

Display data the way you want it

To extract the information you need, all CellSine devices come with easy to use graphing tools.
